SUMMARY

Full stack developer with 3 years of experience designing and implementing technological solutions using React, Node.js, Express, and other technologies. I am always learning new things and am known for being practical, efficient, and a quick learner.

EXPERIENCE

SVA TECH   **Belo Horizonte, MG**
Full-Stack Developer   **2022-Present**

- Responsible for developing and enhancing web dashboards that display and analyze analytical data derived from customer videos. Serving large companies such as Vale do Rio Doce and Rumo Logística, as well as smaller clients, with the aim of transforming complex data into clear and useful insights. Utilizing technologies like NodeJS to ensure the efficiency and security of data interactions, with a strong emphasis on Vanilla JavaScript.
- Experience in agile web application development with Angular, creating intuitive user interfaces, and significantly contributing to the agile development process, involving the development team and stakeholders. Proficiency in code reviews and documentation of proposed architectures.
- Skilled in technologies such as JavaScript, AngularJS, Git, NodeJS, MongoDB, ExpressJS, and Ionic, focusing on problem-solving, bug fixing, and system performance improvement.

HYERDEV   **Goiânia, GO**
Web Developer   **2021-2022**

- Developed and maintained digital solutions for the transportation sector, including corporate websites, tracking systems, and internal dashboards specific to carriers. Using TypeScript, Node.js, Next.js, React, GraphQL, Docker, and AWS tools, focusing on responsive website development and implementing automated tests to ensure code quality and standardization.
- Created custom CMS for carriers, allowing autonomous and efficient content updates, significantly improving the management of their online information. This task involved extensive documentation of architectures and the use of Styled Components for efficient styling.
- Implemented web scraping automations to optimize internal carrier processes, contributing to operational efficiency and the continuous improvement of offered services. Employed agile methodologies to facilitate system maintenance and scalability.

EDUCATION

INSTITUTO FEDERAL DE GOIÁS   **Goânia, GO**
Bachelor's in Information Systems   **2020-2024**
